FALL 1924

SPRING 1925

FALL PRICE-LIST

FOR THE TRADE ONLY

Issued September 6, 1924

Nurserymen and
Growers of
Florists' Plants

Jackson & Perkins Company

Wholesale Only

Newark, New York.

Terms and Conditions of Sale

This list cancels all previous quotations. All agreements and contracts are made subject to crop losses through unavoidable causes.

THE PRICES named in this list are based upon present market conditions, and are subject to change without notice. We invite correspondence with prospective buyers, and shall be pleased to quote special prices on want lists calling for larger quantities than are named herein. On the other hand, these are **wholesale prices** and are applicable only to **wholesale** quantities; in no case will we fill retail orders, even though from nurserymen, at these prices. All orders should be made up in 10's or multiples of 10.

TERMS. The usual terms are offered to those of established credit or whose responsibility is known to us. Cash, security, or satisfactory references required from unknown parties. All bills are due in sixty days unless other arrangements are made at the time of sale. **All prices are net and not subject to any discount** unless specially agreed upon.

SHIPPING. Customers are requested to give definite instructions in regard to manner of shipping that they desire. In the absence of special instructions we will use our own best judgment, but with the express understanding that it is without responsibility on our part. All shipments travel at the risk and cost of the purchaser. We have the New York Central, the West Shore, and Pennsylvania Railroads, also the Rochester and Syracuse interurban trolley line, enabling us to ship in any direction over trunk lines. Express is handled over three of these routes.

BOXES will be charged for at the rates noted below. These are somewhat reduced on account of our being able to buy lumber somewhat more reasonably. These rates, however, do not really cover present actual cost to us.

10 ft. 30 in. x 30 in.	\$4 50	10 ft. 20 in. x 20 in.	\$3 15
10 ft. 28 in. x 28 in. ...	4 20	10 ft. 18 in. x 18 in.	3 00
10 ft. 26 in. x 26 in.	4 00	10 ft. 14 in. x 16 in.	2 50
10 ft. 24 in. x 24 in.	3 50	10 ft. 12 in. x 14 in.	2 30
10 ft. 22 in. x 22 in.	3 25		

Add 50 cts. on all sizes of 12-ft. boxes; decrease in same proportion for shorter boxes.

BALES will be charged for at actual cost of material used. We make no charge for packing or for delivery to the railroad station.

GUARANTY. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any nursery stock, seeds or bulbs we sell, and we will not be in any way responsible for the crop.

CLAIMS for any cause, must be made promptly on receipt of goods. Any stock that is not exactly as represented may be returned to us immediately on arrival, and we will cheerfully and without question credit back the unsatisfactory plants, or send others; **but we will not entertain claims made after goods have been once accepted**, or when report is not made within six days after arrival of the stock.

INSPECTION AND FUMIGATION. Certificate of inspection will be furnished with every shipment and, when required, stock will be fumigated.

SPECIAL NOTICE. Correspondents are requested to use their printed business letterheads. We do not quote prices to retail buyers nor sell to planters; we have **no retail trade** of our own, and sell **to the trade only**; in justice to our **only** customers, the Nurserymen, Florists, and Dealers, we use every effort to limit the distribution of trade prices to those whom we know to be entitled to receive them. **Use printed stationery, or enclose business card.**

LOCATION. We are located thirty miles east of Rochester, N. Y., and cordially invite a visit and inspection of our establishment.

Respectfully,

JACKSON & PERKINS COMPANY

Newark, New York, September 6, 1924.

American Pillar Roses in the foreground, with a mass of blooms to which the photograph hardly does justice. In the background are Dorothy Perkins Roses, trained to stakes for the purpose of obtaining long, straight canes such as are desired by our florist trade.

Roses

In spite of very strenuous efforts to make our production of Rose bushes overtake the constantly increasing demand, we still seem unable to do so. We made an enormous budding a year ago, but on account of protracted dry weather in the summer of 1923, we did not secure a normal "stand," and heavy bookings already made, make us anticipate a decided shortage of good, field-grown Rose bushes before the season is over. We are now booked up to probable supplies upon some varieties, but after our stock is dug, graded, and accurately counted, along in the early winter, we hope to be able to offer many additional sorts. Rose-growing has long been our leading specialty, and while our supplies for this season are not as large as we could wish, they are not unimportant, and we expect to be able to take care of our trade with satisfaction to our customers.

GRADES. For fall delivery we offer only No. 1 grade. For spring shipment we can usually offer No. 1½ (medium) grade at 30 per cent off, and No. 2 grade at 50 per cent off these prices.

Ramblers and Climbers

(o) On own roots

(b) Budded

Varieties marked * are for winter and spring delivery only, being mostly plants which we have had grown on contract for us at other points and which will not be available for fall shipment.

	Per 100		Per 100
o American Pillar. Single rosy pink flowers.....	\$25 00	o Dr. W. Van Fleet. Rich flesh-pink; exquisitely shaped buds.....	\$25 00
ob Aviateur Bleriot. Saffron-yellow..	35 00	o Emily Gray. Yellow.....	50 00

As the flowers expand they become a deep coral-red, with a golden, coppery red suffusion, the base of the petals a rich golden yellow with coppery red sheen.....	45 00
b Los Angeles. The following is the originator's description, all of which we fully endorse: "Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink, toned with coral and shaded with translucent gold at the base of petals. In richness of fragrance it equals in intensity the finest Maréchal Niel. The buds are long and pointed, and expand into a flower of mammoth proportions, while the beauty of form and ever-increasing wealth of color is maintained from the incipient bud until the last petal drops.".....	45 00	b Molly Sharman-Crawford. Pure white.....	35 00
b Lieutenant Chauré. Velvety crimson-red, shaded with garnet; flowers large.....	40 00	b Mrs. Andrew Carnegie. Lemon-white.....	35 00

MESSRS. JACKSON & PERKINS, Newark, New York.

Winona, Ont., April 30, 1924.

Gentlemen: Your order of some days arrived in good order, and I wish to particularly compliment you on the beautiful Rose bushes, and I am wondering how in the world you get such fine roots. They must be budded on different stocks from what we are accustomed to budding upon, and also perhaps grown in a different climate. We wish we could be sure of Roses just like those were all the time, at a moderate price. We would be tempted to give up growing, and give up importing from Holland. Yours truly, E. D. SMITH & SONS, Limited. Per E. D. Smith, President.

The Prices in our list apply only on Wholesale Quantities. Orders should call for 10 of a kind and size, and beyond that for multiples of 10. Stock in storage is tied in 10's and we prefer not to break bundles

Rugosa and Hybrid Rugosa Roses

The comparatively new race of Hybrid Rugosa Roses is a great acquisition for extremely cold climates. They combine size, quality, fragrance and constant blooming habit with the hardiness, vigor, and healthy foliage of the Rugosa type.

(o) On own roots

	Per 100
b Amelie Gravereaux. Carmine-purple; large.....	\$35 00
b Belle Poitevine. Magenta-pink....	35 00
b Blanc Double de Coubert. Pure white.....	35 00
ob Conrad Ferdinand Meyer. Silvery pink; very large; well formed....	35 00
ob F. J. Grootendorst. A new Hybrid Rugosa (<i>Rosa rugosa rubra</i> × <i>Crimson Baby Rambler</i>). True Rugosa foliage; blooms bright crimson, in clusters, produced from early spring to frost: strong but compact, dwarfish grower. Particularly suitable for hedging and mass planting.....	40 00
b Hansa. Red.....	35 00

(b) Budded

	Per 100
b Mme. Lucien Villeminot. Deep pink; large, globular form.....	\$35 00
b New Century. Flesh-pink, with light red center.....	35 00
b Nova Zembla. Flesh-white; large; very full; fragrant.....	35 00

We especially recommend Anemones to our florist customers. They are very useful outdoor flowers for fall cutting, and are very easily grown. For hardy gardens they are also indispensable and give a fine show of attractive bloom at a time when other outdoor flowers are scarce. Note our increased assortment of varieties, including all the best sorts.

	Per 100
AQUILEGIA (Columbine)	\$12 00
California Hybrids. A fine mixture.

Jackson & Perkins Co.'s two acres of greenhouses are used exclusively for the propagation of young stock for growing on in the nursery. The picture on the right is the interior of a greenhouse 265 feet long and containing 72,000 small Roses of various climbing varieties which will later on be planted out in the nursery. The picture on the left is a house of Weigela, Eva Rathke, the entire house of that one sort and numbering nearly 30,000 plants.

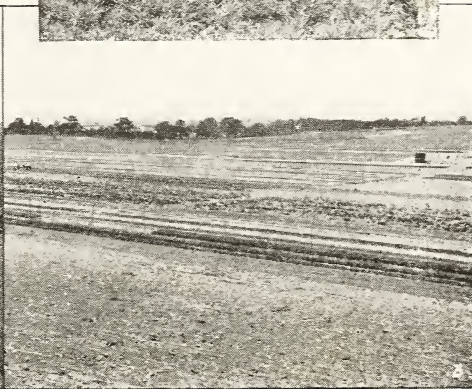

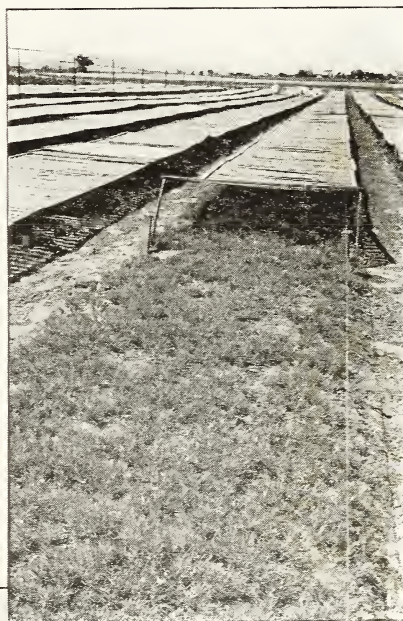

We cannot undertake to supply long and much assorted lists of stock calling for only small quantities of each kind, save at an advance above our printed rates according to quantity

WE have lately started a department for the growing of various kinds of deciduous and coniferous shrubs and trees from seed and hardwood cuttings, and although the department was started only last spring we already have several million young plants of various kinds coming along.

- (1) A section of the seed-beds for the growing of evergreens, with Pine seedlings in the foreground.
- (2) A general view of the department. About 15 acres under overhead irrigation system.
- (3) Hardwood cuttings of various kinds planted in spring of 1924. An excellent stand and making vigorous growth.

Lilacs

Our assortment comprises the cream of the well-known Highland Park collection in Rochester, which is one of the most complete in existence.

JACKSON & PERKINS CO., Newark, N. Y.

Oskaloosa, Iowa, May 8, 1924.

Gentlemen: Here is the money, and besides, I wish to express my grateful appreciation for the nice stock you sent me in such fine condition. It is a pleasure to pay bills when the stock is as satisfactory as yours was. You will hear from me in the future when in need of something good in your line.

Very truly yours,

B. B. WRIGHT.

We have always been rather successful in the growing of Currant bushes, and for this season we have a particularly large and fine block of extra-heavy two-year-old plants, as shown in the above picture

A planting of Lodense Privet bordering one of the walks at the New York Country Club

"LODENSE" PRIVET (*Ligustrum nanum compactum*)

This variety was first put in commerce by us in the autumn of 1923. The name was chosen from over five hundred that were submitted to us in a contest for which we offered a \$100 prize. The prize was won by Mr. E. T. Hofmann, Ilion, N. Y. The name "Lodense," in our opinion, best described the characteristics of the variety.

New Dwarf Privet

Lodense Privet is just the thing nurserymen have been waiting for. It fills a long-felt need for an easily grown, low-priced plant for low hedges and borders. (See illustration above.)

Lodense Privet is something new. There is nothing just like it. It is by far the most important nursery introduction of the year!

Lodense Privet was introduced to the trade only last fall. Already it has become one of the most widely talked of articles for 1925 trade. Nurserymen who have seen it are enthusiastic as to its future and are unanimous in saying that it will find a real place in American horticulture.

Lodense Privet is going to be one of the most rapidly moving items of stock you have ever handled. We know your customers will want it when they see it and learn about its distinctive habits of growth.

Our plans for **Lodense Privet** include extensive propagation to meet the demand that has already been created.

We recommend it very highly as a leader for retail trade, and because the supply will be limited we urge you to get your order in **now**—when delivery can be guaranteed. Strong, healthy stock exclusively.

The Lodense Privet stands shearing very well and makes a very good decorative plant for tubs, pots, and boxes.

PRICES: Strong 3-years-old plants, 10 to 15 in.....	Per 100 \$25 00
2-years-old plants, 8 to 10 in.....	20 00
1-year-old plants, 6 to 8 in.....	12 00
